SOFTWARE REQUIREMENTS SPECIFICATION

Real Estate Business Website Development

Project Title:	Real Estate Web Platform	**Total Budget:**	₹48,000 INR (Fixed Scope)
Document Ver:	1.0 (Final)	**Estimated Timeline:**	2 – 3 Weeks
Target Delivery:	Production Ready	**Prepared For:**	Real Estate Business Client

1. EXECUTIVE SUMMARY & SCOPE

This document details the functional, non-functional, and technical requirements for designing, building, testing, and launching a high-converting Real Estate Agency Website. The platform aims to serve as a digital property showroom and lead capture system for buyers, sellers, and tenants within an all-inclusive budget of **₹48,000 INR**.

2. USER ROLES & ACCESS CONTROL

User Role	Capabilities & Permissions
Public Visitor	Browse active listings, filter properties by budget/location/type, view detailed specs & image galleries, click-to-WhatsApp agent, and submit inquiry forms.
Admin / Agency Owner	Secure login dashboard, create/read/update/delete (CRUD) property listings, upload property media, mark properties as Featured/Sold, and review/export client inquiries.

3. DETAILED FUNCTIONAL MODULES

3.1 Public Website Structure (6 Core Pages)

- **Home Page:** Dynamic hero banner, instant filter bar, featured properties slider, agency stats, customer testimonials, and quick inquiry trigger.
- **Property Listing Page:** Multi-filter layout (Buy/Rent, City/Locality, Property Type, Budget Slider, BHK count) with responsive grid rendering.
- **Property Detail Page:** High-resolution photo gallery, pricing, area in sq. ft., amenities checklist, embedded map location, floor plan viewer, and agent contact card.
- **About Us Page:** Company profile, mission statement, business registration proof/RERA alignment, and team background.
- **Services Page:** Outline of core offerings including Property Buying Assistance, Resale Management, Leasing, and Valuation.
- **Contact Us Page:** Interactive map, head office address, operating hours, phone numbers, and direct lead submission form.

3.2 Lead Capture & Communication Architecture

- **WhatsApp Direct Connect:** Floating, auto-populated click-to-chat action pre-filled with the active property title and ID.
- **Lead Notification System:** Instant email alerts dispatched to agency administrators upon every form completion via Mail API.

3.3 Admin Content Management System (CMS)

- **Listing Management:** Form-based listing creation interface with multi-image drag-and-drop support, price formatting, and amenities tagging.
- **Lead Tracking Table:** Centralized dashboard listing customer name, phone number, email, property interest, and timestamp with CSV export.

4. TECHNICAL & NON-FUNCTIONAL REQUIREMENTS

Parameter	Specification Details
Frontend Tech Stack	Next.js / React or Mobile-First HTML5, CSS3, Tailwind CSS for optimal loading performance.
Backend & Database	Node.js API with PostgreSQL/MongoDB or lightweight Headless CMS / WordPress engine.
